

# IEC Web Site Visits (January 2008)

## {90,607 Unique Visits}

Please notice that “Unique Visits” count is different than the “Number of Hits” many Web sites use. It is a more accurate count of the actual users by counting the computer (or more accurately the IP address) as a visit. So, multiple visits from the same computer (or IP address) during a day is only counted as one.

To provide a comparison, the similar stat from January 2007 (Total number of unique visitors: 21,288) is presented below which indicates more than 325% increase in visitor count for the same period of last year but 1% decrease over the previous month (December 2007, 91,213 Unique Visits).

Below is the detail count in table format.
