

IEC Web Site Visits (September 2008) {78,983 Unique Visits}

Please notice that “Unique Visits” count is different than the “Number of Hits” many Web sites use. It is a more accurate count of the actual users by counting the computer (or more accurately the IP address) as a visit. So, multiple visits from the same computer (or IP address) during a day is only counted as one.

To provide a comparison, the similar statistics from September 2007 (Total number of unique visitors: 67,787) is presented below which indicates over 16% increase in visitor count for the same period of last year and 51% increase over the previous month (August 2008, 52,288 Unique Visits).

Below is the detail count in table format.
